MEF Reference Wiki

Welcome to the MEF Reference Wiki

The MEF Reference Wiki is a source of materials provided for the benefit of all parts of the digital services and communications services industries. It is designed to make it easier to access information on work defined and implemented by the MEF, and related topics. It is edited by the MEF membership via the MEF Wiki.

The Reference Wiki is constantly under development and we recommend 'watching' this page to keep notified of those updates.

⚠ Some of the links in the MEF Reference Wiki point to areas in the MEF Wiki that are accessible to MEF member companies only.

If you don't already have a MEF Wiki account but you do have an email domain of a MEF member company, you can join the MEF Community by signing up by yourself.

If your company is not yet a member of the MEF, but you think MEF membership would be relevant, you find information here.
